

EASILY AND AUTOMATICALLY

backup your Microsoft 365

Simple as it never was...

Simply add the Microsoft 365 organization account in our panel to start protecting your Microsoft services. Add it once to protect all the time.

Backup as you wish...

Define whether the backup should be made once or automatically at a specified frequency. Set it up once and forget it - it will work as you wish...

Cross-user recovery

Restore protected data to the original user mailbox or choose a different one from your Microsoft 365 organization account.

Backup of all your mailboxes

Choose one, many, or all mailboxes of your company that you want to protect. Create a complete backup copy and keep it safe on your data storage.

Keep an eye on your data

Easily search through protected mailboxes by username, e-mail address, or user alias and browse messages inside the mailbox.

Encrypted backup

Your data are encrypted by AES 256 CBC algorithm considered as impossible to break. Only you can decrypt them.

Protect shared mailboxes

Do you share mailboxes with your colleagues? Don't lose your data. Protect them as simple as individual ones.

Restore what you need

Choose whether you want to restore the entire mailbox, multiple messages, or just a single one.

Storage saving

We respect your storage - thanks to deduplication and compression our backup is faster and your storage saved.
